

AMENDMENTS TO THE SPECIFICATION:

Please amend paragraph [031] of the Specification as follows:

[031] Referring now to Figure 2A, examples of index table **204** and transaction table **206** are shown. As noted, index table **204** provides information that indexes the items stored by content management system **100**. For example, index table **204** allows library server **104** to locate one or more objects stored in resource manager **106**, which correspond to a particular item. As shown, index table **204** may comprise an item identifier column **208**, a timestamp column **210**, and one or more value columns **212**.
